Subject Index of Volume 65

Acetonitrile
new aspect of photoinduced electron transfer in acetonitrile, 149
Adiabatic pathway
dynamics of *cis*-stilbene photoisomerization: the adiabatic pathway to excited *trans*-stilbene, 29
Adiabatic photoreactions
adiabatic photochemistry with luminescent products, 95
Adsorption
fluorescence lifetimes of supersensitizing systems and dyes adsorbed onto TiO_2, 399
Anthracene photodimerization
triplet sensitization of anthracene photodimerization in γ-cyclodextrin, 313
2-Anthrylethylenes
effects of β-substituents on internal rotation of the anthryl group of 2-anthrylethylenes in the excited singlet state, 41
Argon matrix
photochemistry of cyclic 1,3-bis(diazo)ketone in fluid solution and in an argon matrix, 229
Aromatic acetone
singlet- and triplet-state photodissociation of C–O and C–N bonds in aromatic acetones studied by ^{1}H-CIDNP spectroscopy, 371
Aromatic carbonyl compounds
time-resolved electron spin resonance study of hydrogen abstraction reaction of aromatic carbonyl compounds in their $\pi\pi^*$ triplet states, 183
Aryldisilanes
photochemistry of aryldisilanes and disilanylquinones: novel photochemical process from intramolecular charge-transfer states, 111
Aza-1,2-diarylethylenes
photochemistry of aza-1,2-diarylethylenes, 121

β-Substituents
effects of β-substituents on internal rotation of the anthryl group of 2-anthrylethylenes in the excited singlet state, 41
Benzophenone
benzophenone-sensitized reactions of pentacyanonitrosylferrate(II), $[Fe(CN_5)NO]^{2-}$, 355
heat of formation of the benzophenone ketyl radical by time-resolved photoacoustic calorimetry, 15
Boron doping
photoelectrochemical investigations on boron-doped chemically vapour-deposited diamond electrodes, 419

Cellulose
influence of photocatalytic systems on the photo-cross-linking of diallyl oxydiethylene dicarbonate grafted onto cellulose, 431
Charge-transfer states
photochemistry of aryldisilanes and disilanylquinones: novel photochemical process from intramolecular charge-transfer states, 111
Chlorosomes
chlorosomes, photosynthetic antennae with novel self-organized pigment structures, 61
Continuous wave exposure
photochemical and photothermal reactions on polymer surfaces, 293
Cyclic 1,3-bis(diazo)ketone
photochemistry of cyclic 1,3-bis(diazo)ketone in fluid solution and in an argon matrix, 229
γ-Cyclodextrin
triplet sensitization of anthracene photodimerization in γ-cyclodextrin, 313

Diallyl oxydiethylene dicarbonate
influence of photocatalytic systems on the photo-cross-linking of diallyl oxydiethylene dicarbonate grafted onto cellulose, 431
Diamond
photoelectrochemical investigations on boron-doped chemically vapour-deposited diamond electrodes, 419

1,2-Dihydro-1,4-dicyanonaphthalene
photochemistry of 1-substituted 1,2-dihydro-1,4-dicyanonaphthalenes, 383
Dimer radical cation
charge-resonance spectra of dimer radical cations studied by laser photolysis, 53
Disilanylquinones
photochemistry of aryldisilanes and disilanylquinones: novel photochemical process from intramolecular charge-transfer states, 111
Dye–borate ion pairs
photoinitiated electron transfer reactions in dye–borate ion pairs: energy distance and solvent dependence, 191
Dyes
fluorescence lifetimes of supersensitizing systems and dyes adsorbed onto TiO_2, 399

Electrochemical techniques
new applications of electrochemical techniques, 285
Electron transfer
new aspect of photoinduced electron transfer in acetonitrile, 149
time-resolved electron paramagnetic resonance study on the photoinduced electron transfer reactions from metalloporphyrins to quinones, 177
electron transfer photochemistry of endoperoxides, 157
photoinitiated electron transfer reactions in dye–borate ion pairs: energy, distance and solvent dependence, 191
relationship between exciplex fluorescence and electron transfer in radical ion pairs, 133
Endoperoxides
electron transfer photochemistry of endoperoxides, 157
Ethylperoxy radicals
UV absorption spectrum of the ethylperoxy radical and its self-reaction kinetics between 218 and 333 K, 329
Excimer laser ablation
excimer laser ablation of polyethersulfone derivatives: periodic morphological micro-modification on ablated surface, 303
Excimer laser exposure
photochemical and photothermal reactions on polymer surfaces, 293
Exciplex fluorescence
relationship between exciplex fluorescence and electron transfer in radical ion pairs, 133

Fluorescence lifetimes
fluorescence lifetimes of supersensitizing systems and dyes adsorbed onto TiO_2, 399

Intermolecular styrene–amine exciplex
physical and photochemical behavior of intermolecular and intramolecular styrene–amine exciplexes, 205
Intramolecular styrene–amine exciplex
physical and photochemical behavior of intermolecular and intramolecular styrene–amine exciplexes, 205

Laser photolysis
charge-resonance spectra of dimer radical cations studied by laser photolysis, 53
Laser spectroscopy
laser spectroscopy and photochemistry in micrometre small volumes, 235
Light energy conversion
aspects of metal phthalocyanine photosensitization systems for light energy conversion, 267
Luminescence
adiabatic photochemistry with luminescent products, 95

Merocyanine dye
(photo)isomerization dynamics of merocyanine dyes in solution, 79
Metal phthalocyanine
aspects of metal phthalocyanine photosensitization systems for light energy conversion, 267
Metalloporphyrin
photochemical epoxidation of alkene by visible light in a redox system involving metalloporphyrins and water, 211
Metalloporphyrins
time-resolved electron paramagnetic resonance study on the photoinduced electron transfer reactions from metalloporphyrins to quinones, 177
Micrometre small volumes
laser spectroscopy and photochemistry in micrometre small volumes, 235

Olefins
potential energy surfaces of one-way and two-way photoisomerization of olefins, 1
Oxidation
autosensitized oxidation of *o*-phenylenediamine in an aqueous buffer solution, 391

Pentacyanonitrosylferrate(II)
benzophenone-sensitized reactions of pentacyanonitrosylferrate(II), $[Fe(CN_5)NO]^{2-}$, 355
o-Phenylenediamine
autosensitized oxidation of *o*-phenylenediamine in an aqueous buffer solution, 391
Photo-cross-linking
influence of photocatalytic systems on the photo-cross-linking of diallyl oxydiethylene dicarbonate grafted onto cellulose, 431
Photoacoustic calorimetry
heat of formation of the benzophenone ketyl radical by time-resolved photoacoustic calorimetry, 15
Photocatalytic systems
influence of photocatalytic systems on the photo-cross-linking of diallyl oxydiethylene dicarbonate grafted onto cellulose, 431
Photochemical epoxidation
photochemical epoxidation of alkene by visible light in a redox system involving metalloporphyrins and water, 221
Photodissociation
photodissociation of zinc diiodide in the gas phase, 345
singlet- and triplet-state photodissociation of C–O and C–N bonds in aromatic acetones studied by ^{1}H-CIDNP spectroscopy, 371
Photoelectrochemistry
photoelectrochemical investigations on boron-doped chemically vapour-deposited diamond electrodes, 419
Photoisomerization
dynamics of *cis*-stilbene photoisomerization: the adiabatic pathway to excited *trans*-stilbene, 29
potential energy surfaces on one-way and two-way photoisomerization of olefins, 1
stereoselective photoisomerization of ψ-retinal, 73
(photo)isomerization dynamics of merocyanine dyes in solution, 79
Photoresist
design of high-resolution positive-working photoresist, 77
Photosensitization
aspects of metal phthalocyanine photosensitization systems for light energy conversion, 267
Photostabilizers
ultrafast studies on proton transfer in photostabilizers, 165
Photosynthetic antennae
chlorosomes, photosynthetic antennae with novel self-organized pigment structures, 61
Pollution
solar photodegradation of xenobiotic contaminants in polluted well water, 409
Polyethersulfone derivatives
excimer laser ablation of polyethersulfone derivatives: periodic morphological micro-modification on ablated surface, 303
Polymer
photochemical and photothermal reactions on polymer surfaces, 293
Protein-free pigment structure
chlorosomes, photosynthetic antennae with novel self-organized pigment structures, 61
Proton transfer
ultrafast studies on proton transfer in photostabilizers, 165

Quinones
time-resolved electron paramagnetic resonance study on the photoinduced electron transfer reactions from metalloporphyrins to quinones, 177

Radiation-induced reactions
photoinduced formation and reaction of benzalaniline radical anions: comparison with the radiation induced reaction, 197
Radical anions
photoinduced formation and reaction of benzalaniline radical anions: comparison with the radiation induced reaction, 197

Radical ion pairs
relationship between exciplex fluorescence and electron transfer in radical ion pairs, 133
ψ-Retinal
stereoselective photoisomerization of ψ-retinal, 73

Singlet state
effects of β-substituents on internal rotation of the anthryl group of 2-anthrylethylenes in the excited singlet state, 41
singlet- and triplet-state photodissociation of C–O and C–N bonds in aromatic acetones studied by ^{1}H-CIDNP spectroscopy, 371
Solar photodegradation
solar photodegradation of xenobiotic contaminants in polluted well water, 409
Supersensitizing systems
fluorescence lifetimes of supersensitizing systems and dyes adsorbed onto TiO_2, 399

Triplet sensitization
triplet sensitization of anthracene photodimerization in γ-cyclodextrin, 313
Triplet state
excited triplet states as probes in organized systems. An overview of recent results, 249
photothermal investigations on the dark triplet states, 21
singlet- and triplet-state photodissociation of C–O and C–N bonds in aromatic acetones studied by ^{1}H-CIDNP spectroscopy, 371
time-resolved electron spin resonance study of hydrogen abstraction reaction of aromatic carbonyl compounds in their $\pi\pi^*$ triplet states, 183

UV absorption
UV absorption spectrum of the ethylperoxy radical and its self-reaction kinetics between 218 and 333 K, 329

Xenobiotic contaminants
solar photodegradation of xenobiotic contaminants in polluted well water, 409

Zinc diiodide
photodissociation of zinc diiodide in the gas phase, 345
